ABOUT ME

Computer Science student with hands-on experience in frontend development.

Built multiple projects involving APIs, web scraping, and basic automation.

Currently focusing on Cyber Security, with growing knowledge in networking and Linux fundamentals, and seeking an internship to gain practical experience

EDUCATION

A computer science student specializing in Cyber Security at the Arab Open University (AOU) will graduate in 2028.

PROJECTS

Expense Tracker

- Built a Python-based expense tracking application with full CRUD operations
- Managed user transactions by implementing data storage and structured data handling
- Designed a simple interface for adding, updating, and deleting expenses
- Implemented input validation and basic error handling for data accuracy

Weather App

Developed an application using APIs to fetch and display real-time weather data

- Processed JSON data and implemented basic error handling

To-Do List App

- Built a task management application using Python with CRUD operations
- Implemented input validation and basic data handling

Tic-Tac-Toe Game

- Developed a Python-based game with basic game logic and user interaction

Currency Converter

- Created an API-based application to convert currencies in real time
-

SKILLS

- | | | |
|-------------|--------------------|-------------------|
| • Python | • Basic Networking | • Data Structures |
| • HTML, CSS | • Git, GitHub | • Problem Solving |
